

## CIHR Summer Program in Aging: Save the Date!

The CIHR Institute of Aging has partnered with The Quebec Network for Research on Aging to host an innovative five-day training program:

### Geroscience: A novel interdisciplinary approach for research on aging

This unique, interactive training program will run from May 26 to May 31, 2019 and will be held at the Estérel Resort in the Laurentian Mountains, 100 km from Montreal. Graduate students and post-doctoral fellows working in, or interested in learning about, research related to the area of Geroscience are encouraged to apply.

Trainees will have the opportunity to participate in advanced training that crosses disciplines and brings together trainees, researchers, and members of the public and private sector from Canada and abroad.

The program will feature internationally renowned guest speakers, and networking opportunities will be offered throughout the week.

The program will be launched in December 2018 on the CIHR ResearchNet. More information will follow in the coming months.
